Hey there! 👋

Remote work has transformed the way we build careers, giving professionals the opportunity to work from anywhere while collaborating with top global teams.

Use this resource as your starting point, stay consistent with your applications, and keep improving your skills along the way. The opportunities are out there... you just need to take action.
Wishing you the best of luck in landing your next remote role! 🚀

1. Build a strong online presence
Make sure your LinkedIn, portfolio, and GitHub (if applicable) clearly show your skills and results. Remote companies often check your digital footprint first.

2. Focus on results, not responsibilities
Instead of listing what you were "responsible for," highlight measurable outcomes.
Show impact: growth, performance improvements, revenue, automation, efficiency.

3. Tailor every application
Avoid sending the same CV everywhere. Adjust your resume and cover letter to match the job description and company culture.
